

Anti-Vaccination and Anti-Mask Posters

- We have recently been made aware of incidents occurring around the UK in which anti-vaccination and anti-mask posters have been put up which contain hidden razor blades. In some case people have been injured where they've attempted to remove the poster.
- CIC's are therefore advised not to attempt to remove any anti-vaccination or anti-mask posters.
- Where CIC's suspect a razor blade is present, they should inform the police by calling 101 and submit a near miss.
- And also if possible contact the respective Local Authority contact for the posters to be removed safely. Please see following slide re the various contact details.

Where to report fly-posting & sightings of Anti Vaccination stickers / posters / graffiti
